Trouble accessing a Punchout catalog? Try these tips...

If you get a security message when trying to open the punchout, allow the page to display non-secure content/items.

Ex. Click “Yes” to display nonsecure items

Browser settings for IE, Chrome, Safari, and Firefox must allow pop-ups and accept cookies from: solutions.sciquest.com

Browser settings can be accessed through these menus:

- Tools > Internet Options > Privacy (IE)
- Options > Under the Hood (Google)
- Preferences > Security (Apple)
- Tools > Options > Content and Privacy (Mozilla)

Ex. For IE

1. Select Tools > Internet Options > Privacy from the menu bar.

Then select Settings under the Pop-up Blocker.
2. Type in the address of website to allow, solutions.sciquest.com, and click the Add button. The website name will be added to the list of allowed sites.
